***Status of the Claims***

Currently claims 1-3,9,10,12,14-18,28,29,31-35,37-42,44-50,52,53 are pending. Upon review of the original claims in light of the specification, examiner believes that a the invention contains multiple species and has elected to set forth a restriction outlining the various embodiments.

***Election/Restrictions***

This application contains claims directed to the following patentably distinct species: 1) Plate: figures 2,7,10,25; and  
2) pegs/fixation: 3,3a,4,13; and 26

The species are independent or distinct because though the species are related to similar invention, the species are distinct because they are mutually exclusive and not obvious variants.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 3738

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).
